

## TED - Ed Student Talks at DPS Sushant Lok is Honing Rational Thinkers and Radical Innovators

DPSSL has launched the TED-Ed Student Talks Program developed by TED Conferences LLC ("TED") to support students and teachers who wish to meet regularly to discuss, debate and explore ideas. This global connect initiative has inspired the students to hone their interest in public speaking and cultivate a culture of unique idea generation through TED styled ignited talks.

The program provides a forum for students to develop, present and record their own, original ideas in the form of short, TED Talk-style presentations. The TED Program focuses on three core tenets. **Discover, Develop and Share**. It helps discover what excites the students the most, what they find worthy of thinking, of researching and of learning. It develops ideas, matures a thought into a captivating story or a presentation and develops personal bonds with fellow international TED students and educators. In continuation to the learning, it develops the young thinker to an ace public speaker and finally share ideas, personal stories and narratives with the world.

The students have started to explore this wonderful platform and are paving a way ahead to a holistic understanding and practice of public speaking through the help of TED Ed approved curriculum under the guidance of their teacher leaders and facilitators.
